■ File Descriptions

File Name	Description
api/services/review.dart	Handles business logic for adding and retrieving reviews.
api/services/review.repository.dart	Handles data access and persistence for reviews.
api/controllers/tenant.controller.js	This file does not need splitting and remains unchanged.
api/controllers/vendor.creations.js	Handles vendor creation, update, and deletion operations.
api/controllers/vendor.queries.js	Provides query-based operations for vendors, such as getting a single vendor or listing vendors.
services/requests/create_request.py	Handles creating new requests.
services/requests/get_request.py	Retrieves existing requests.
services/requests/update_request_status.py	Updates the status of a request.

File Name	Description
services/auth/user_management.py	Handles user creation, deletion, and updates.
services/auth/authentication.py	Manages user authentication, including signin, signup, and token validation.
services/razorpay/payment_handler.py	Handles payment creation and management.
services/razorpay/signature_verification.py	Validates Razorpay payment signatures and handles verification.
api/models/user.model.js	This file remains unchanged and is not necessary to split.
api/controllers/user.crud.py	Handles CRUD operations for user profiles.
api/services/auth/user_auth.py	Handles user authentication and session management.
api/controllers/listing:create.js	Handles creating new listings.
api/controllers/listing:delete.js	Handles deleting existing listings.
api/controllers/listing:update.js	Handles updating existing listings.
api/controllers/listing:get.js	Handles retrieving single listing requests.
api/controllers/listing:getListings.js	Handles retrieving list of listings.
api/models/tenant.model.js	This file does not need splitting and remains unchanged.
api/models/virtual/model/object.js	Handles the definition and validation of object types.
api/models/virtual/model/requests.js	Defines and validates request objects for API endpoints.
api/schemas/listing.schema.js	Defines the schema for the `Listing` model.
api/services/listing.service.js	Provides a service layer for interacting with the `Listing` model.
api/models/review.model.js	This file does not need splitting and remains unchanged.
api/routes/listing/CREATE_listing.py	Handles creating new listings.
api/routes/listing/UPDATE_listing.py	Updates existing listings.
api/routes/listing/DELETE_listing.py	Handles deleting listings.
api/routes/listing/GET_listing.py	Retrieves a single listing.
api/routes/listing/GET_listings.py	Retrieves a list of listings.
api/app.py	The main application logic and configuration.
api/routes/auth.py	Handles authentication-related routes.
api/routes/user.py	Manages user-related routes.
api/routes/listing.py	Handles listing-related routes.
api/routes/vendor.py	Handles vendor-related routes.
api/models/model.py	Contains the database models for this application.
api/routes/reviews/api.js	Handles API endpoints for reviews, including adding and retrieving reviews.
api/routes/reviews/webhooks.js	Manages webhooks for review-related events, such as when a review is added or updated.
api/routes/tenant.route.js	This file does not need splitting and remains unchanged.
services/auth/token_handler.py	Handles JWT token generation and validation for user authentication.

File Name	Description
services/user/user_endpoint.py	Manages user-related API endpoints, including get, post, put, and delete operations.
api/services/requests/controller.py	Handles business logic for requests, including CRUD operations.
api/routes/requests/rest_api.py	Determines the RESTful API routing for the requests service.
services/auth/auth.route.js	Defines authentication routes for the application.
services/auth/auth.controller.js	Handles business logic for authentication, including user registration and signin.
services/auth/session_handler.js	Handles user session management.
services/auth/token_handler.js	Manages JWT token generation and validation.
api/controllers/vendor/api.routers. py	Handles API request routing and vendor operations.
api/controllers/vendor/authenticati on.routers.py	Handles authentication-related APIs for vendors.
services/error-handling.js	Provides error handling functionality for the application.
client/index.html	This file is an HTML template for the application's user interface and remains unchanged.
client/src/components/Header.jsx	Handles the app's header component.
client/src/components/Footer.jsx	Manages the app's footer component.
client/src/routes/LandingRoute.jsx	Handles the app's landing route.
client/src/pages/SignedInRoute.js x	Handles the app's signed-in route.
services/comment/comment_form _service.py	Handles the logic for creating and handling comments.
components/forms/textarea_input. py	A reusable text area input component for forms.
services/sessions/session_handle r.py	Manages user sessions, such as storing and retrieving user data.
client/.eslintrc.cjs	This file does not need splitting and remains unchanged.
client/assets/config/postcss.config .py	Configures PostCSS for the client-side assets.
client/src/components/Footer/logo. jsx	Contains brand name and logo JSX components.
client/src/components/Footer/navb ar.jsx	Defines navigation links and their styling.
client/src/components/Footer/soci alLinks.jsx	Generates social media links with icons.
client/src/components/Footer/cont actInfo.jsx	Provides contact information and its styling.
client/package.json	This file does not need splitting and remains unchanged.
client/src/components/Loader.jsx	This file does not need splitting and remains unchanged.
services/auth/private_route_handl er.py	Handles private route logic for authenticating and redirecting users.
client/src/components/Card.layout .jsx	Handles the layout and styling of the Card component.
client/src/components/Card.data.j sx	Manages the data fetching and processing for the Card component.

File Name	Description
components/about/slider/slider.jsx	Contains reusable Slider component for About section.
components/about/cards/card_container.jsx	Manages card layout and container for About section.
components/about/cards/card.jsx	Represents individual card component for About section, handling data and layout.
client/src/components/components/LandlordContactInfo.jsx	Displays landlord contact information such as name, phone number, email, and address.
client/src/components/components/LandlordContactForm.jsx	Handles the form input and sends an email to the landlord using the entered message.
client/src/components/map/renderer.py	Renders the Map Search component with markers and popup windows.
client/src/services/map/map_services.py	Provides services for interacting with the map, including marker clicks and navigation.
client/src/components/map/search_results.py	Handles search results and navigation to search results pages.
client/src/components/PaymentButton.jsx	This file does not need splitting and remains unchanged.
client/src/services/oauth/googleAuth.py	Handles Google OAuth authentication and session management.
client/src/services/oauth/tokenHandler.py	Generates and validates JWT tokens for authenticated users.
client/src/components/SearchBar.css	This file does not need splitting and remains unchanged.
client/src/graphql.js	Handles GraphQL API setup and connection.
client/src/index.js	Initializes the main app setup, including Redux provider and ReactDOM.render.
client/src/services/chart/data_loader.py	Loads and processes chart data from API responses.
client/src/services/chart/chart_renderer.py	Renders chart visualizations using the pre-processed data.
client/src/services/chart/graph_utils.py	Provides utility functions for graph manipulation and calculations.
client/src/components/search/SearchBarComponent.jsx	This file contains the main logic for rendering the search bar component.
client/src/components/search/SearchBar.css	This file contains CSS styles for the search bar component.
client/src/components/map/constants.js	Contains global constants for the map component.
client/src/components/map/mapContainer.js	Handles the rendering of the map container and its child components.
client/src/components/map/marker.js	Defines the marker icon and its behavior for the map.
client/src/index.css	This file defines global styles for the application and does not require splitting.
client/src/components/Card.jsx	A reusable React component for rendering listing information.
client/src/services/search/search.service.js	Provides search functionality and manages API calls for listing data.
components/forms/SignInForm.jsx	Handles form validation and submission.

File Name	Description
components/SignInComponent.jsx	Renders the sign-in page with reusable components.
services/auth/signInService.js	Provides business logic for sign-in functionality, including authentication and session management.
client/src/pages/LandMain.jsx	Main entry point for the Land page, responsible for rendering the page's layout.
client/src/components/LandComponents.jsx	Contains reusable components used throughout the Land page, including the swiper, typewriter, and navigation.
client/src/pages/search.css	This file does not need splitting and remains unchanged.
services/firebase/firebase_config.py	This file contains the Firebase configuration settings.
services/firebase/firebase_init.py	This file initializes the Firebase app and exports the app instance and storage references.
client/src/pages/profile.css	This file does not need splitting and remains unchanged.
client/src/components/AboutSection.jsx	Contains the About section component with the title and description.
client/src/components/MissionStatement.jsx	Handles the display of the mission statement section.
client/src/components/WhyChooseUs.jsx	Contains the Why Choose Us section with the icons and text.
client/src/services/PropertyDetailsService.js	Handles fetching and caching property details.
client/src/components/PropertyCard.js	Renders the property card with images and details.
client/src/services/BookingService.js	Manages booking requests and communicates with the server.
client/src/pages/property.css	This file does not need splitting and remains unchanged.
client/src/pages/userDash/side.css	This file is responsible for defining the styles for the Dashboard component.
features/user/sidebar/sidebar_links.py	Handles the list of links for the user's dashboard
features/user/sidebar/sidebar_renderer.py	Renders the user's dashboard sidebar
client/src/services/auth/BuildProfileAuth.js	Authenticates users and manages build profiles.
client/src/components/BuildProfileForm.js	Handles form input and submission for building tenant profiles.
client/src/services/image/AadhaarUpload.js	Manages uploading and storing aadhaar images.
services/data/fetch_properties.py	Handles data fetching for properties list.
components/properties_list.py	Renders a list of properties with their details.
components/profile_handler.py	Handles profile-related operations, such as fetching and updating profile data.
client/src/components/UserData.js	Handles user data fetching and processing
client/src/components/VendorData.js	Fetches and displays vendor listing data
client/src/components/CommentHandler.js	Handles comments and their updates

File Name	Description
client/src/pages/userDash/Loader.js	Displays a loading message while data is being fetched
client/src/pages/components.css	This file contains a collection of CSS styles for UI components
client/src/pages/vendor/Dash.css	This file does not need splitting and remains unchanged.
client/src/services/api/tenant_api.py	Handles API calls to fetch tenant data and update tenant status.
client/src/components/TenantList.py	Displays a list of tenants and provides functionality for handling click events.
client/src/components/TenantStatus.py	Displays the status of a tenant (accepted or rejected) and provides functionality for updating the status.
client/src/pages/vendor/Dash.jsx	This file does not need splitting and remains unchanged.
client/src/url.jsx	This file does not need splitting and remains unchanged.
client/vite.config.js	This file does not need splitting and remains unchanged.
client/tailwind.config.js	This file does not need splitting and remains unchanged.
package.json	This file does not need splitting and remains unchanged.
services/auth/user_auth.py	Handles user authentication and session management.
services/user/user_manager.py	Manages user profiles, organizations, and profile building.
client/src/pages/vendor/showlist.css	This file contains CSS styles for a showlist component.
client/src/redux/store.js	This file does not need splitting and remains unchanged.
client/src/pages/video.mp4	This file does not need splitting and serves as a multimedia resource in the application.
